Calcium gluconate	100 mg / ml 10 ml	amp
Aqua pro injectionibus/Water for injection	solution for injection: 2 ml in ampoules	amp
Aqua pro injectionibus/Water for injection	solution for injection: 5 ml in ampoules	amp
Aqua pro injectionibus/Water for injection	solution for injection: 10 ml in ampoules	amp
Sodium lactate, complex solution of Sodium chloride + Potassium chloride + Calcium chloride + Sodium lactate	injection of 100 U / ml and 5 ml; 10 ml in a bottle	ml
Potassium chloride	4%	vials
Potassium chloride	7.50%	vials
Sodium lactate, complex solution of Sodium chloride + Potassium chloride + Calcium chloride + Sodium lactate	injection of 100 U / ml and 5 ml; 10 ml in a bottle	ml
Complex solution of Sodium chloride + Potassium chloride + Calcium chloride	solution for infusion	ml
Sodium chloride)	solution for injection / infusion: 0.9% isotonic (equivalent to Na + 154 mmol / l, Cl - 154 mmol / l)	ml
Sodium hydrogen carbonate)	injection: 1,4 % - 8,4 %	ml
Syringes		
Dressing materials		

Loratadine	10 mg	tab
Ethanol	solution: 70% (denatured)	ml
Povidone-iodine	solution: 10% (equivalent to 1% active iodine)	ml
Chlorhexidine	solution: 0.05% (bigluconate)	ml
Loperamide	solid oral dosage form: 2 mg	tab
Paracetamol)	solution for oral use:	vials
Activated charcoal/sorbents	solid oral dosage form: 0.25 g	tab
Ibuprofen	Aults/kids	tab
wound care	cotton wool, bandages, plasters, Zalfgaas
